Vorld — City Fact Sheet

Global launch · 1 May 2026 · Free for all riders

VELOSOLUTIONS × VORLD

More riders. More visits. More reasons to come back.

Vorld is a free app that turns any equipped Velosolutions Pump Track into a live, connected community platform. Riders time their laps, earn points for every visit, follow a global ranking, and belong to something bigger than their local track. The Vorld timing system is installed below the surface of the track by Velosolutions — completely invisible, requiring no power and no maintenance. Once it is in, the city does not need to do a thing.

WHAT CHANGES FOR YOUR TRACK

- Your track appears on the Vorld map — visible to riders worldwide.
- Live results and rankings are public from day one.
- Every rider has a personal reason to return — points are earned for every session, not just fast ones.
- The track becomes part of a global community of riders across 55 countries.

FOR EVERYONE, NOT JUST RACERS

Any discipline

Bike, Skateboard, Inline Skates, Scooter and Wheelchair — each with its own ranking.

Any age

Under 17, Open and 40+ categories. The 8-year-old and the 50-year-old both have a place in the ranking.

Any level

Showing up counts more than speed. A rider who comes 20 times earns more than one who comes once with the fastest time.

WHAT RIDERS NEED TO DO

Download the free Vorld App. Find the track on the map. Hit Start Timing, phone in pocket, and ride. Timing starts automatically at the start line. Slide to stop when done — lap times and points appear. Free, always.

WHAT THE CITY GETS

- Track live on the global Vorld map from activation day.
- Public results and rankings — no work required from the city.
- Usage statistics and community notification tools coming in a future phase (paid subscription).
- The Vorld timing system is installed below the surface — invisible, no power needed, no maintenance required.

HOW TO GET YOUR TRACK EQUIPPED

The Vorld timing system is installed below the surface by Velosolutions — invisible, requiring no power and no maintenance. Included as standard on all new Velosolutions Pump Tracks. Cities with existing tracks can request installation separately. Once activated, the track is live immediately.
